InterSystems at Big Data Minds DACH 2022 in Berlin, Germany

Hi Community,

We're super excited to share with you our upcoming appearance at the **10th anniversary** Big Data Minds **DACH 2022 in Berlin, Germany**!

Date & Time: 18 – 20 September 2022

Location: Maritim proArte Hotel Berlin, Friedrichstraße 151 ¦ 10117 Berlin

This event is organized by we.CONECT and InterSystems will lead a " Challenge your peers " session titled **Looking for a silver bullet in data management - data mesh, data fabric or something else entirely?** " We will be discussing questions like:

- Which data management technology is best suited to ensure the long-term success of a company today?
- In your opinion, what are the main requirements for a modern data management solution?
- If you could change anything about the way your company handles data today, what would it be and why?
- How many data silos do you estimate exist in your organization?
- If you and your employees were given access to all relevant data in your company tomorrow, what project would you want to implement first on that basis?
- Who do you think should have supremacy over data: the respective department/project team, the central IT department or the management?
- What would be the biggest hurdles in your company that would have to be overcome for an overarching view of all data?

Don't miss this great opportunity to discuss the different approaches for modern data management to efficiently get "From Big to Smart Data" in a company of like-minded peers!
