Cache Web Terminal Release 3.1.4

Hi ISC Community!

I'm pleased to announce new release of [Caché Web Terminal 3.1.4.](#)

What's new:

1. Drag'n'drop to Studio installation: just import xml in any namespace.

2. After import and comilation access your web terminal app on URL server:port/terminal/.

F.e. localhost:57772/terminal/

Slash is mandatory.

3. No need to use %CACHELIB anymore - please feel free to update your Caché and continue using CWT.

Download release [here](#).

Source code for view and contribute [here](#).

Post your issues [here](#). Want to add your own features - fork it!

[Featured screencast](#)   (previos version).

Enjoy!
