Login link from Comment window doesn't work

If you're not logged in and you're looking at a post and you get the "Log in to comment" link it doesn't actually do anything or log you in. Clicking on the Login button in the upper right does work however.

Here's the link:

<https://community.intersystems.com/user/login?destination=node/404401%23...>

MacOS/Chrome
