## Important Announcement: Problems with Atelier field test distribution

Do to unforeseen circumstances the Atelier build that was distributed with the Cache 2016.2 field test had certain incompatibilities which prevented its effective use with the server that it was bundled with.

We are working on remediating this regrettable situation and will provide a compatible Atelier in the 2016.2 field test refresh which is scheduled for today Monday, 1st of February.

We sincerely apologize for any inconvenience so caused.
