No namespaces reported by selected server

I'm trying to add a new project in atelier following the introduction video

But I get a "No namespaces reported by selected server" error:

I can connect to the server though:

 Server Connection Configuration   

Configure a Server Connection

Connection succeeded

Connection Name: 60

Web Server Configuration

Address: 172.18.22.60 

Port: 57772 

☐ SSL

Credentials

Username: nicki

Password: ●●●

☐ Show password

Test Connection

 Connection succeeded

Finish

Cancel
