Developer Community - March 25th Update

Here are the release notes for the release planned for Friday, March 25th.

Task

- [DCE-64] - Need breadcrumbs at top of post detail page (/post)
- [DCE-71] - Developer Synchronization: Main page now filtering Feedback
- [DCE-80] - Change ranking (relevancy) definition on the search results page
- [DCE-87] - Need tag cloud page
- [DCE-88] - Install AutoComplete Deluxe Module
- [DCE-89] - Tag selection in New Post should work like JIRA's tag selection
- [DCE-90] - Tag selection in New Post should auto-select group
- [DCE-92] - Developer Synchronization: Email template modifications

Bug

- [DCE-76] - Search results need to be formatted like other post listings
- [DCE-81] - Author of "Answer" can't edit the answer in PROD
- [DCE-82] - Create a New Post missing from /tags and /search page
- [DCE-83] - Change "Join the Conversation" button to "Save" everywhere
- [DCE-84] - Developer Synchronization: Default sort settings for home page
- [DCE-85] - Answer notification email provides link to comment/answer, no way to get back to question/context
- [DCE-86] - Save Draft permission needs to be set
- [DCE-91] - Anonymous should not be able to add comments or answers. Now login links for anonymous users redirect to correct pages after login.

Note that the subscription emails have been completely revamped and improved. Much thanks to Ben Spead for his efforts on this.
