Developer Community March 2016 Digest

Hi, Community!

Here is the digest of the most interesting and valuable articles published on Developer Community in March 2016.

If we missed something interesting, please feel free to add it in comments.

So, here we go!

News and Events

[Caché and Ensemble 2016.1 Release](#)

[New Book, Caché and MUMPS – Part II](#)

[Global Summit Contest I](#)

[Global Summit Contest II](#)

Most commented

[Class Projections and Projection Classes](#) – 15 comments

[How to display or save stack information?](#) – 12 comments

[Using Class Queries - %SQL.Statement versus %Library.ResultSet](#) – 12 comments

[How can I pass multiple parameters to an Ensemble REST service and return an authorization token as a response JSON message](#) – 11 comments

[No namespaces reported by selected server](#) -10 comments

[Managing source code across Caché and Ensemble version upgrades](#) – 10 comments
