Global Summit 2016 - Upgrades: Minimizing Business Disruption

Presenter: Paul Dayan

Task: Upgrade with minimal downtime

Approach: Provide examples of planning minimal-downtime upgrades from a variety of starting scenarios

When upgrading Caché, Ensemble or your application on your business-critical system, you want zero or minimum downtime. This session explores the problems and options when upgrading, and how mirroring can reduce or eliminate business disruption, with practical steps and a demonstration.

Content related to this session, including slides, video and additional learning content can be found [here](#).
