Global Summit 2016 - HS: Smart Programs and Alerts for Patient Cohorts

Presenter: Randy Pallotta

Task: Automatically create cohorts of high-risk patients. Send them critical action alerts

Approach: Use the new HealthShare features: “ Smart Programs ” and “ Advanced Clinical Notifications ”

In this session, we will cover HealthShare "Smart Programs" and "Advanced Clinical Notifications" which allow you to automatically create cohorts of high risk patients in Health Insight and Information Exchange and to send critical actionable alerts. After this session, you should understand this new feature and how to configure a new program or alert.

Content related to this session, including slides, video and additional learning content can be found [here](#). Please note that this content is available only to HealthShare customers and attendees of the Global Summit. On the learning web site you will be prompted for your Global Summit credentials to access this content.
