## Global Summit 2016 - HS: Achieving High Availability with Mirroring

Presenters: Pete Greskoff, Sebastian Musielak

Task: Ensure high availability of your HealthShare deployments

Approach: Discuss high-availability options and focus on HealthShare 's new support for database mirroring

With the new release of HealthShare, Mirroring is now support for high availability. This session will describe high availability options and focus on mirroring your HealthShare deployments.

Content related to this session, including slides, video and additional learning content can be found [here](#).
