## Global Summit 2016 - Big Load: Massively Parallel Data Ingestion

Presenter: Harry Tong

Task: Load terabytes of data into a distributed environment

Approach: Leverage parallelism and open-source tools

In this session, we ' ll discuss how to load TBs of data into a distributed environment, leveraging parallelism and open source to reach exceptional load rates.

Content related to this session, including slides, video and additional learning content can be found [here](#).
