Global summit: short presentation and demo of Caché Quality (static code analysis for ObjectScript); Monday April 11th at 12:30pm, developer community desk, developer zone

Hello!

Link: https://demo.cachequality.com

In this presentation, developer oriented, we will cover this tool, how it works, how you can use it/administer it, etc. Duration 30 minutes.

The topics will include:

- a short presentation of Caché Quality and SonarQube (which this plugin uses),
- a demonstration of the rules and how to tailor them to your need.

Questions will be more than welcome! Hope to see you there!

And a big thanks to Evgeny Shvarov who made this possible!
