Automatic block indent/dedent

In Atelier is there a way to configure automatic indent when typing open/close braces? From what I've found this is usually left to the language (e.g. Java > Editors) but I couldn't find a setting under the Atelier preferences.

For reference, this is what Studio does:

And here is Atelier:

Notice the return after the open-brace doesn't indent and the close-brace doesn't unindent.
