Announcing New InterSystems Product Documentation UI (beta)

We have put a new modern and responsive UI design on top of our existing product documentation. It is available in a public beta here: <http://docs.intersystems.com/beta/csp/docbook/DocBook.UI.FramePage.cls>

Please review the new design and give us your feedback.

Note: the Class Reference UI has not been updated and all product documentation content is the same as what's in production now.
