## Roman Number Converter

Hi,  
My name is Sergio Fernandes and I'm from Brazil.  
I would like to know how can i use MVBasic at Cache Terminal or .csp.  
My original problem is to converter Integer Numbers to Roman Numbers and consulting cache documentation I found "Conversion Codes" at <http://localhost:57772/csp/docbook/DocBook.UI.Page.cls?KEY=GVRFbasicfea...>  
My version is InterSystems Ensemble 2013.1.6.950.0  
Thanks a lot,

Sérgio Fernandes
