## Developer Community - May 30th Release Notes

Developer Community was refreshed on May 30th with the following new features and fixes:

1. Formatting of postings in My Collaborations and My Content has been improved
2. Browse by Tag now has filtering options for New, Highest Rated and Unanswered posts
3. Full paging is back on the home page
4. Browse by Tag now includes child tags. Example - posts tagged only with "MDX", which is a child tag of "DeepSee", will appear when using Browse by Tag and viewing DeepSee content
5. Browse by Member is now available. Content by member can be viewed from the list of members under "Browse by Member" on the home page or from the Connect | Members page by selecting "View Content"
6. Notification email template is now rendering in HTML
7. Bug: Paging on the "View by Group" page is broken
8. Bug: omments to Answers do not increase comments counter

The next build will feature two new views of content, including a "Compact View" and a consolidated "View by Tag" optimized for viewing content across the entire site.
