## Zen Mojo - Method Push and Pop

I have two pages and I am using the push and pop to go and back navigation. When I click the button forward and back in the browser, I can't navigate more between pages.

The following code:

Page 1 - onSelect Method:

```
var obj = {idExame: VALID, objUsu: ObjUsu};  
zenPage.gotoArea ('itemexames', key, key, false);  
view.pushDocument (key, obj, key, obj);
```

Page 2 - onSelectMethod, back:

```
var documentKey = "PacienteExamesinitial";  
var layoutKey = "PacienteExamesinitial";  
var area = "pacienteexames";  
  
view.popDocument ();  
zenPage.gotoArea (area, layoutKey, documentKey, false);
```

I am using ZenMojo with Bootstrap.

Can someone help me?

Thanks

Alexandre Marques
