DeepSee cubes building troubleshooting

Hi!

Sometimes you see that call to DeepSee cube building method:

```
w ##class(%DeepSee.Utils).%BuildCube("CubeName")
```

does nothing.

Here are my 2 cents on possible reasons.

1. Run DeepSee Reset method in certain Namespace:

```
NAMESPACE> w ##class(%DeepSee.Utils).%Reset()
```

and try again.

2. Make sure, that all the indices in your base class for the cube are rebuilt, rebuild them and run it again:

```
w ##class(%DeepSee.Utils).%BuildCube("CubeName")
```

Hope this will save some time for you, and will be helpful as was to me.
