Fix RSS feed title field

Is there any update on when the RSS feed will be fixed to finally include a Title field. This was reported about 5 months ago. Specifically:

The RSS feed for groups (or communities as the link currently says) does not include a title, e.g. for:

<https://community.intersystems.com/group/8081/feed>

Starts with:

```
<title></title>
<link>https://community.intersystems.com/group/8081</link>
<description></description>
```

So there is no title or description of this feed. Also is there a feed for all content posted to this site, so not filtered by tag/group at all?
