# Does Ensemble has support for seal a flatfile with HMAC?

Hi

I do not really have much information yet about an upcoming mission but i know it is about to seal a flatfile and then send it further. I think SHA256 HMAC will be used. There is a fixed sealkey to be used each time. Does anyone know if the Ensemble supports this ? I have looked in the documentation but not really found anything .

Regards,

Michael Lundberg
