EWD 3: Integrating Cache and Node.js. Free Training Course

I've released a comprehensive, free online training course on the new EWD 3 suite of products that allow the integration of Cache with the burgeoning Node.js world, and allow you to create and run browser-based and mobile applications with all the very latest development technologies from the JavaScript world.

The training course consists of presentation slide decks that you can go through at your own pace and in your own time. It takes you step by step through all aspects of the EWD 3 technologies, in particular the ewd-xpress platform, showing you how to create applications. It includes loads of code examples.

Go to http://www.mgateway.com and click the Training tab for full details.
