ERROR - SQL Error '[Cache ODBC][State : S1000][Native Code 29]

I have been using the query below and it was working fine but now it's giving a SQL error. There were no changes made that could cause this to stop working. There is no Field 'APPLICATIONID' in the table.

```
QueueSQL=select distinct (convert(char(5),SkillsetID)+'='+Skillset) from iagentbySkillsetStat where ApplicationID > 10000  
QueueMappingSQL=SELECT DISTINCT (convert(char(5),SkillsetID)+'='+Skillset), SkillsetID FROM iagentbySkillsetStat iagentbySkillsetStat WHERE (iagentbySkillsetStat.ApplicationID>10000)
```

DB- Intersystems Cache

Error details for the log files are below.

```
14/09/2016 11:20:05 a.m. > ERROR - SQL Error '[Cache ODBC][State : S1000][Native Code 29]  
[C:\xlink\xlink Compiled Package\Xlink Application\Ispis_Ul.exe]  
[SQLCODE: <-29>:]  
[Cache Error: <errdone+2^%qaqqt>]  
[Details: ]  
[%msg: < SQL ERROR #29: Field 'APPLICATIONID' not found in the applicable tables^select distinct ( convert ( char ( 5 ) , SkillsetID ) + :%qpar(1) + Skillset ) from iagentbySkillsetStat where ApplicationID >>]'
```

Thanks in advance.
