Atelier "Check for updates" broken?

Here's what I get when I check for updates from my 1.0.245 on Windows:

```
Cannot complete the install because one or more required items could not be found.  
  Software being installed: Atelier IDE 1.0.255 (com.intersys.eclipse.feature.estudio  
.feature.group 1.0.255)  
  Missing requirement: Connection Manager 1.0.255 (com.intersys.eclipse.connmgr 1.0.2  
55) requires 'bundle com.fasterxml.jackson.core.jackson-  
databind 0.0.0' but it could not be found  
  Cannot satisfy dependency:  
    From: Atelier IDE 1.0.255 (com.intersys.eclipse.feature.estudio.feature.group 1.0  
.255)  
    To: com.intersys.eclipse.connmgr [1.0.255]
```
