Caché and Ensemble 2016.2.0 Release

InterSystems is happy to announce the availability of our newest Data Platforms release: Caché and Ensemble 2016.2

The highlights of 2016.2 are:

- Server support for Atelier, the new Eclipse-based IDE
- Support for [OAuth 2.0 and OpenID Connect](#)
- SQL syntax has been enriched with support for JSON
- SQL improvements and performance enhancements

For complete technical details of what's changed in 2016.2, review the [Caché release notes](#) and the [Ensemble release notes](#). Additional materials have been posted to the [InterSystems Developer Community](#).

Atelier is available separately and the initial release will be announced separately. This is expected within a few weeks.

2016.2.0 is available for all supported platforms, including these new platforms:

- Ubuntu 16.04 LTS for x86-64 as a development platform
- Red Hat Enterprise Linux 6, 7 in Microsoft Azure for x86-64

For a complete set of the platforms supported, including specific point releases and patches, see the [Supported Platforms Document](#). The build corresponding to this release is 2016.2.0.736.0
