RSS Feed problems

Evgeny

Thank you for your help yesterday at the Belfry.

When I try to subscribe to the RSS feeds using some news readers they do not accept them.

The W3C validator makes a lot of suggestions about what might be wrong, but my guess is that the feed title is blank. Could this be fixed please?

W3C feed validator results for a group:

<http://validator.w3.org/feed/check.cgi?url=https%3A%2F%2Fcommunity.intersystems.com/feed>
