Zen Mojo 1.1.2 released

I am happy to share the news that Zen Mojo 1.1.2 has been released. This release includes a critical fix for Firefox that we had to get out as fast as possible. No other changes are included to allow easy upgrades. We recommend upgrading to this release if you are running on Zen Mojo 1.1.1.

All upcoming Caché and Ensemble releases will ship with Zen Mojo 1.1.2.

You can download Zen Mojo kits from the WRC distribution page: <https://wrc.intersystems.com/wrc/Distribution.csp>

Any fix or enhancement that was previously planned for Zen Mojo 1.1.2 will be included in the next upcoming release 1.1.3.
