Deltanji 6.1 - new release of the integrated native source code management tool for Caché, Ensemble, HealthShare

We at George James Software recently released a new version of Deltanji, the native source code management tool for Caché, Ensemble and HealthShare.

Version 6.1 includes several enhancements, including easy creation of labels. Bulk transfer of large codesets is also now available from the browser UI.

A perpetually free "install and go" Solo Edition of Deltanji is available. Licenses can be purchased for other editions that provide more advanced code management and deployment features.

Deltanji is compatible with Atelier. It can also manage external files.

Please visit <http://georgejames.com/deltanji> for more information and to download your free Solo Edition.
