SOAP Fault handling with ERROR #5659: Property '%ZHSLIB.Audit.LogParticipant::Log' required

Environment: Cache for Windows (x86-64) 2015.2.2 (Build 811U) Thu Mar 3 2016 12:55:48 EST [HealthShare
Modules:Core:14.01.351

When try the following to send back SOAP Fault, is the following correct way?

```
Set fault=##class(%SOAP.Fault).%New()  
Set fault.faultcode=$$$FAULTServer  
Set fault.faultstring="Processing Error"  
Set fault.detail= "Error on server"  
Do ..ReturnFault(fault)
```

Got the error
