How to set a beutiful name for settings field in BusinessOperation

I saw in: http://docs.intersystems.com/latest/csp/docbook/DocBook.UI.Page.cls?KEY=... How to add a Setting to a Host, BO , BS or BP. But, how to set a beautiful name for a setting? Ex for properties: Property foo As %String; Property bar As %String; Parameter SETTINGS = "foo,bar"; I'd like something like: "A foo property" "A bar Property"
