## [ANIMATION] How to make a post

First, [register](#) to make postings.

Here is the short gif which demonstrates how to post, paste text from Word, make COS highlighting and put Group and tag.

Here it is:

The screenshot shows the InterSystems Developer Community forum interface. At the top is a navigation bar with links for LEARN, COMMUNITY, INTERSYSTEMS, MY ACCOUNT, and LOG OUT. Below this is a search bar with the placeholder text "Type your search text here". The main content area is titled "Top Postings" and includes tabs for "my feed", "most active", "most votes", "new", "unanswered", and "all". The first post is titled "Is there a way to determine row level security in runtime?" and is tagged with "SQL". The post content discusses row level security and access calculation. It has 1 answer, 0 comments, 46 views, and a 3-star rating. The post is by Eduard Lebedyuk, posted 2 days 23 hours ago, with the last answer 5 hours 40 min ago. The second post is titled "How to print a series of files on disk to the windows print spool." and is tagged with "ZEN". The post content discusses printing files to the Windows print spool. It has 0 answers, 0 comments, 26 views, and a 3-star rating. The post is by Peter Kopp, posted 2 days 1 hour ago. On the right side of the forum, there is a sidebar with a "Create a New Post" button, a "Welcome Evgeny Shvarov" message, a "LINKS" section with links to "Try InterSystems Caché" and "Contribute feedback about", and a "TOP STORIES" section with links to "Registering for Global Server now?", "InterSystems Technology Amazon EC2...", and "InterSystems Data Platform performance".
