[ANIMATION] How to make a post

First, [register](#) to make postings.

Here is the short gif which demonstrates how to post, paste text from Word, make COS highlighting and put Group and tag.

Here it is:

The screenshot shows the InterSystems Developer Community interface. At the top, there is a navigation bar with the InterSystems logo and links for LEARN, COMMUNITY, INTERSYSTEMS, MY ACCOUNT, and LOG OUT. Below this is a search bar with the placeholder text 'Type your search text here'. The main content area is titled 'Top Postings' and features a list of posts. The first post is titled 'Is there a way to determine row level security in runtime?' and is categorized under 'SQL'. It has 1 answer, 0 comments, 46 views, and a 0 rating. The post is by Eduard Lebedyuk, posted 2 days 23 hours ago, with the last answer 5 hours 40 min ago. The second post is titled 'How to print a series of files on disk to the windows print spool.' and is categorized under 'ZEN'. It has 0 answers, 0 comments, 26 views, and a 0 rating. The post is by Peter Kopp, posted 2 days 1 hour ago. On the right side of the page, there is a sidebar with a 'Create a New Post' button, a 'Welcome Evgeny Shvarov' message, and sections for 'LINKS', 'TOP STORIES', and 'InterSystems Technology'.
