License Restriction for Aetlier in TRYCACHE preview

Hi, I just installed the TRYCACHE 2016.2.1 preview release into a 16.04 Ubuntu VM. The install is dirt simple. Very nice. I've installed Eclipse Neon and used your update site link to get Atelier. Also very simple and nice. Thank you!

I see there is a January update coming. Will it be possible to include a license that lets developers launch one terminal session while connected to the TRYCACHE instance via Eclipse?

When I try to do this, I'm exceeding the TRYCACHE license limit.

thanks!
