SFTP Unable to send FXPOPEN error

Hi all,

I've a problem with EnsLib.FTP.OutboundAdapter

I've configured this adapter using a SFTP connection, it has been working the first time but now its raising the following error message:

ERROR <Ens>ErrFTPPutFailed: FTP: error al colocar archivo '1600000107279008930.pdf' (mensaje='Error in SFTP Put('C:\stream\QhFaDm4L1Jrgbg.stream','mypath/1600000107279008930.pdf') ERROR #7500: Error SSH '-2146430933': SSH Error [8010102B]: Unable to send FXPOPEN* [8010102b] at SFTP.cpp:539,0',código=0)

This is part of my code:

```
try {
    set name = pRequest.FileName
    set ..Adapter.FilePath = pRequest.FilePath

    set tSC = ..Adapter.PutStream(name, pRequest.DocBase64)
    if $$$ISERR(tSC) $$$ThrowStatus(tSC)

} catch ex {
    set ret = ex.AsStatus()
}

quit ret
```

is there any idea about this error?

Thanks in advance

Kurro
