# How to calculate percentage of all for a member in DeepSee?

Hi, All!

What is the calculated measure expression for the percentage of a member?

Say in Holefoods I want to see in a Cols Online sales in Revenue, All the revenue and % of Online sales for the Revenue?

I have the following:

Rows		Columns	
Drop row here		Online	Revenue
		Revenue	Revenue
		Drop column here	
		Drop column here	
Online Revenue		Revenue	
\$8,335.29		\$12,483.96	

With expression:

```
SELECT NON EMPTY {NONEMPTYCROSSJOIN([Channel].[H1].[Channel Name].&[2],[Measures].[Amount Sold]),[Measures].[Amount Sold]} ON 0 FROM [HOLEFOODS]
```

How can I add the percentage of All in Revenue for Online channel?
