Unable to run this file REST Class file in USER Namespace

Hi, I tried the new rest file in User namespace. But I couldn't run it.

Here the Code:

```
Class com.Testing Extends %CSP.REST
{

XData UrlMap
{
<Routes>
<Route Url="/insert" Method="POST" Call="one"/>
<Route Url="/print" Method="POST" Call="two"/>
<Route Url="/update" Method="POST" Call="three"/>
</Routes>
}

ClassMethod one()
{
Write "This is 1st Method!!"
Quit
}

ClassMethod two()
{
Write !,"This is 2nd method"
Quit
}

ClassMethod three()
{
Write !,"This is 3rd Method"
Quit
}

}
```

I tried it in the below link:

<http://localhost:57772/csp/user/testing/insert>

Can anyone help me resolve this error?
