HTTP request payload

I am sending an HTTP request to cache class:

```
s rObj=##class(%Net.HttpRequest).%New()  
s rObj.Server="www.xyz.com"  
s rObj.Https=1  
s rObj.SSLConfiguration="xyz"  
s rObj.ContentType="application/json"  
d rObj.EntityBody.Write("payload in json format")  
  
s sc=rObj.Post("/csp/ns/xyz.cls")
```

The request gets to the OnPreHTTP class method

```
Class xyz Extends %CSP.Page [ ProcedureBlock ]  
{  
  
ClassMethod OnPreHTTP() As %Boolean  
{  
    q 1  
}  
}
```

The question is how to retrieve the request payload in the OnPreHTTP method.
