Production : Routing a File

Hi All,

I need to route a file based on its type in Ensemble Production. But I don't want to write a Business Process code to achieve this. Am using FilePassThroughService to get a file.

There are two FilePassthrough operations for different type of files. Is there anyway to achieve this using Business Process Rule itself?

Also how to get the filename in Business Process Rule that comes from FilePassThroughService?

Thanks in advance.

#Business Operation #Business Process (BPL) #Business Rules #Business Service #Ensemble
