Using Atelier REST API

Hi everyone!

From [documentation](#):

... Unless ... you need to provide a username and password to access the API ...

... so the complete URL for GetServer is: <http://localhost:57772/api/atelier/>

Try this:

```
curl --user name:password "http://localhost:57772/api/ateiler/"
```

Response is:

```
<HTML>...<BODY><H1>Not Found</H1>  
The requested URL /api/ateiler/%CSP.Login.cls was not found on this server.<P>  
</BODY></HTML>
```

What I'm doing wrong?
