License problem in cache 5.02

Hi All,

We using cache 5.02. We have some problem regarding license usage.

Some time it license limit exceed.

At the time we run `W ##Class(%SYSTEM.License).DumpLocalInUse()`

it create dump file for license usage.

We got following,

57) User ID = 3psehnjp00, Connections = 1, CSP Count = 1, Time active = 142
56) User ID = 3pxkhljy00, Connections = 1, CSP Count = 1, Time active = 95
57) User ID = 3pt9hqOm00, Connections = 1, CSP Count = 1, Time active = 136
58) User ID = 3ps1hlQp00, Connections = 1, CSP Count = 1, Time active = 144
64) User ID = 192.168.1.1, Connections = 2, CSP Count = 0, Time active = 12018

The 64 is regarding to our terminal connection. We are using CSP and PHP with cache5.02

We don't the reaming thing?

Thanks,

Sansa
