Firefox search engine for InterSystems documentation

If you're using Firefox, you probably know that there are search engine addons that allow us to use website search directly. Now, docs.intersystems.com is also available as a search engine [here](#). Here's how it looks:

And after clicking on InterSystems search engine you're redirected to the docs.intersystems.com:

Firefox search engine for InterSystems documentation

Published on InterSystems Developer Community (<https://community.intersystems.com>)

The screenshot shows the InterSystems Online Documentation search interface. The browser address bar displays the URL: docs.intersystems.com/latest/csp/docbook/DocBook.UI.SearchPageZen.cls?KeyWord=macro. The page header includes the InterSystems logo and navigation links. The search bar contains the keyword 'macro'. Below the search bar, there are filters for 'Search type' (set to 'Find topics with all words'), 'Search type' (set to 'Exact match (except for case)'), and 'Search type' (set to 'Search'). There are also buttons for 'Reset', 'Search the Web', and 'Help'. Below the search bar, there are filters for 'Optionally restrict the search' with dropdowns for 'all products', 'all books and articles', and 'all tags'. The search results are displayed in a yellow box with the heading 'Matches in titles: 1'. The results include 'InterSystems Programming Tools Index > Tools Index > Macros' and 'macro (Index Entry)'. Below the search results, there is a section titled 'Displaying matches in text (527 results in 154 topics):'. This section contains several links to documentation pages, including 'Using Caché ObjectScript > ObjectScript Macros and the Macro Preprocessor', 'ObjectScript Macros and the Macro Preprocessor', 'Using Macro', 'Preprocessor Directives Reference', 'Using System-supplied Macro', and 'link'. The text describes the Caché ObjectScript compiler's support for preprocessor directives and macros, and provides an example of a macro definition and invocation.
