Cache UnitTest Manager RunTest Error #5007

Hi All,

Am attempting to run sample unit tests as per
Caché %UnitTest Tutorial
Example: Executing a Test Using Set-Up and Tear Down Methods

and getting an ERROR #5007:

The Terminal detail is as follows:

```
SAMPLES>Set ^UnitTestRoot="C:\UnitTests"
SAMPLES>write ^UnitTestRoot
C:\UnitTests
SAMPLES>do ##class(%UnitTest.Manager).RunTest("MyTests")

ERROR #5007: Directory name '/usr/cachesys/mgr/samples/C:/UnitTests/MyTests/' is inva
lid
SAMPLES>
```

The '/usr/cachesys/mgr/samples/' part is the correct path for the namespace 'SAMPLES' and the
'C:/UnitTests/MyTests/' part is the correct local path as specified by '^UnitTestRoot' + 'Child Directory = MyTests'.
The file 'Tests.xml' resides within this path => ' C:/UnitTests/MyTests/Tests.xml' .

This is my first attempt at Unit Testing in Cache and as such would appreciate any advice that can put me on the
right track as to what I may of either missed or not understand in this process.

Please advise if and what other information I should supply.

Cheers,

Gordon
