Vote for the Developer Community

Hi, Community!

DC BADGES

Become an Insightful Author!

You know, we are tracking the votes for your articles on DC. When your posts gather 100 votes (in total), you will be rewarded with the Insightful Author Badge and...

 650  0

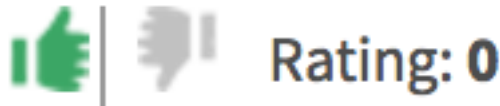

This post is an invitation for you to use the voting system in Developer Community.

Once registered in Developer Community you can vote!

You can vote both for articles, questions and announcements, and for answers and comments too.

Voting is the fastest and evident way to express your like or dislike for the posting.

To do the vote choose thumbs up as positive and thumbs down for the negative vote in the control below the every posting.

Why voting?

You can see the most voted postings ever in the [most votes](#) filter, which you can find on top of the feed.

Introducing new JSON capabilities in Caché 2016.1

 Caché, Interoperability, JSON, Web Development

This post is intended to guide you through the new JSON capabilities that we introduced in Caché 2016.1. JSON has emerged to a serialization format used in many places. The web started it, but nowadays it is utilized everywhere. We've got plenty to cover, so let's get started.

Every month we post the [digest](#), where you can see Top-10 most voted postings of the month.

Last week we introduced the "Insightful Author" badge in [Global Masters](#) (see the picture above) for Developer Community member who reaches 100 votes for the postings.

It also adds 650 points to your Global Masters account.

Please, bring us the ideas how we can use the Developer Community voting system better e.g. with comments to this post.

And I hope you'll vote for this post too ;)
