Get property value in trigger

Hello,

I work with trigger and I need after update make INSERT into LogTable value of property of saved class. This is what I have in this moment.

```
S className = ..%ClassName(1)
S cls=##class(%Dictionary.CompiledClass).%OpenId(className)
F i = 1:1:cls.Properties.Count() {
    S prop = cls.Properties.GetAt(i)
    S propName = prop.Name
    S value={propName*N}
}
```

How Can I get value given "prop".

Thank you
