## Caché and Ensemble 2017.2 Field Test Release

InterSystems is pleased to announce the Field Test release of Caché and Ensemble 2017.2.0

The entire product team at InterSystems looks forward to hearing about your experiences with this latest version of our Data Platform products.

You can get this release from the [Field Test portal](#). It includes hundreds of bug fixes and new features, including:

- DeepSee improvements to the Folder Manager and Dashboard Filters
- iFind and iKnow improvements like cooccurrence search, REST API extensions, and performance when building iKnow domains
- Improved XML VDoc performance in Ensemble
- Caché Nodejs now supports Node 7

Consult the release notes and upgrade checklist that can be downloaded from the Field Test portal for more details.
