InterSystems iKnow analytics against Developer Community posts
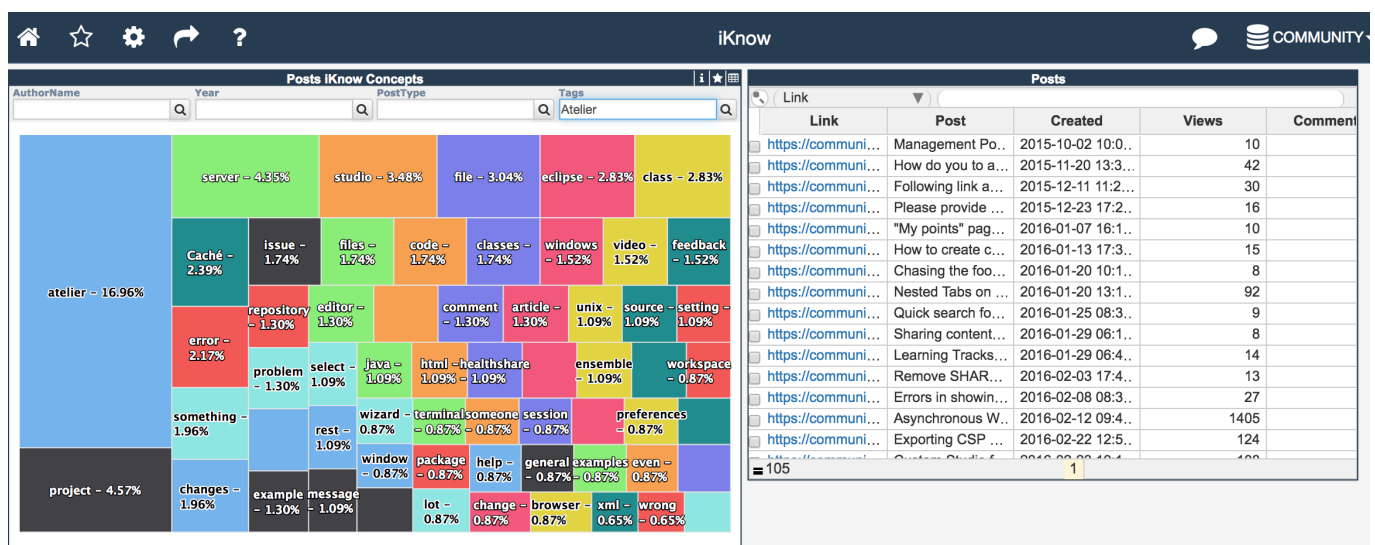

Hi, Community!

Hope you know and use the [Developer Community Analytics](#) page which build with [InterSystems DeepSee](#) and [DeepSee Web.](#)
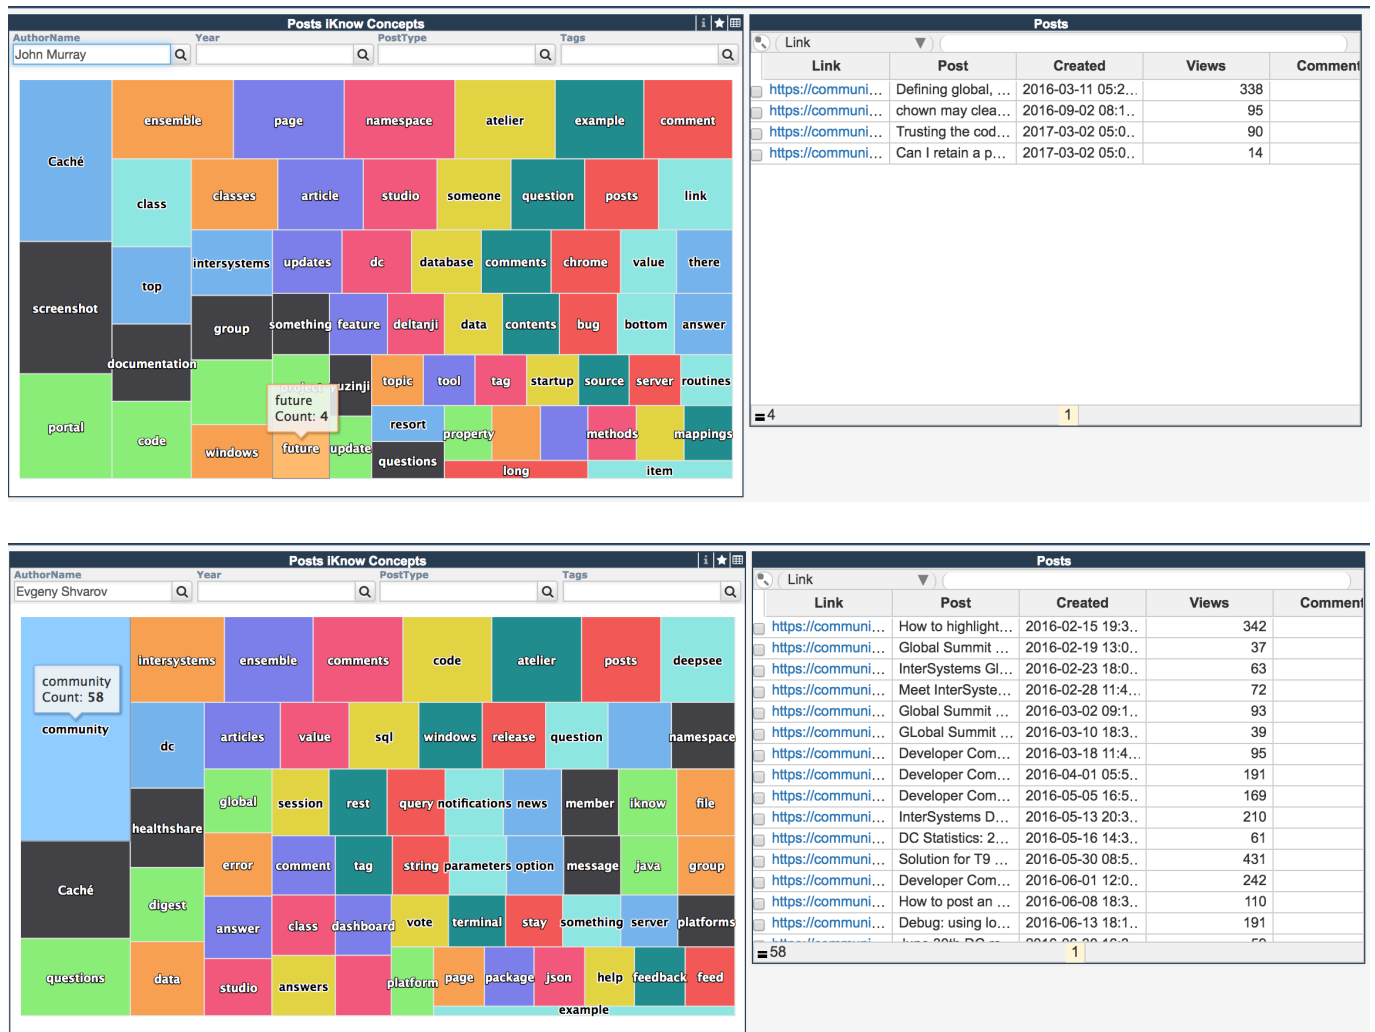

We are playing with [InterSystems iKnow](#) analytics against Developer Community posts and introduced the new dashboard, which shows Top 60 concepts for all the posts:

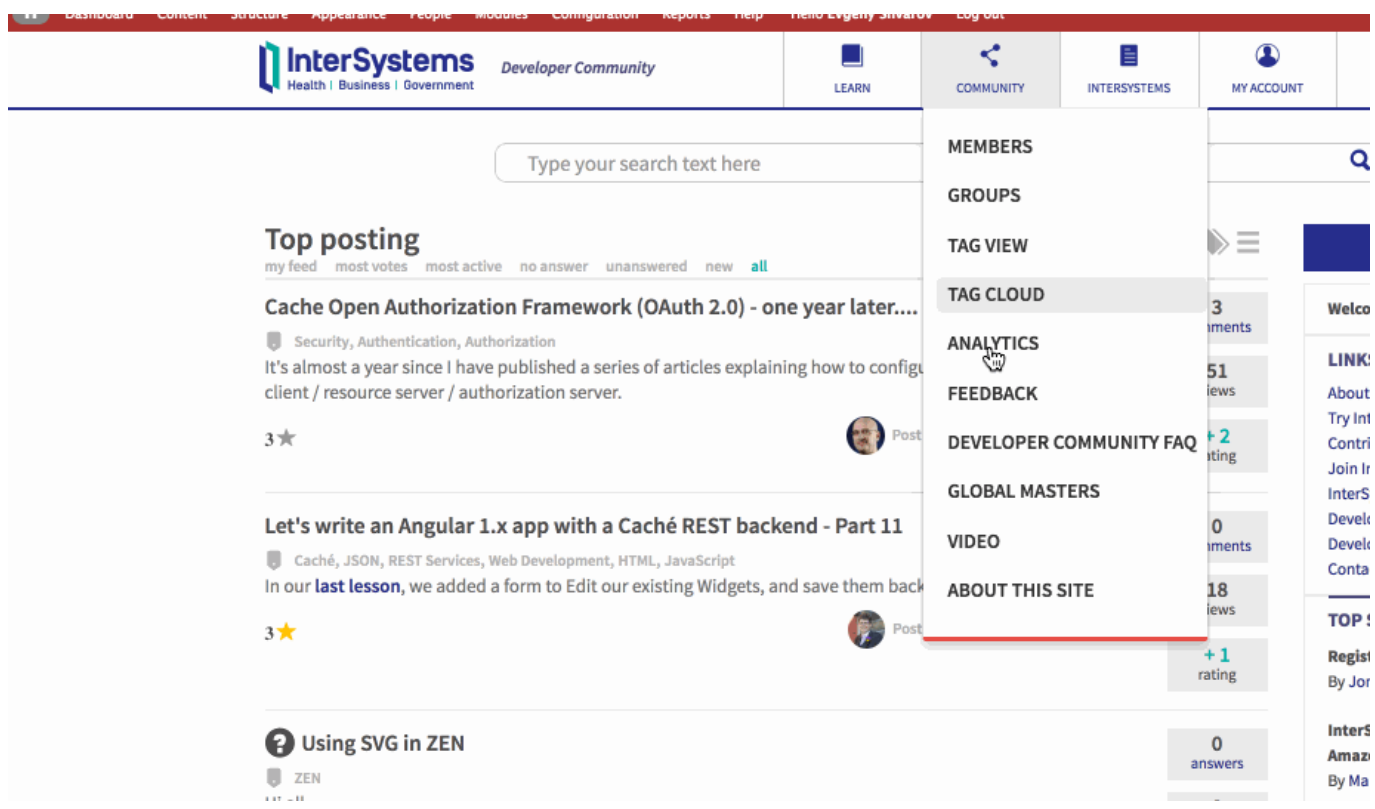

Or play with filters and see the top concepts for Atelier tag:

Or the top concepts of a particular member:

Click on the concept on the left and see the related articles on Developer Community. Here is small gif how it works:

Next we plan to introduce concepts on Answers too and to fix tags and introduce new tags according to the concept stats.

Your ideas and feedback would be much appreciated.
