## June 2017 DC Release: better notifications, permalinks, bug fixes

Hi, Community!

Today we deployed new DC release which delivers.

Better subscriptions

All subscription settings now placed in one page, unified and simplified.

Subscription

Current subscriptions

✓ Show All

Posts

Members

Tags

Groups

<input checked="" type="checkbox"/>	CSP skeleton key	Post	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/>	Security	Tag	<input type="checkbox"/>
<input checked="" type="checkbox"/>	Atelier	Group	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/>	Alexander Koblov	Member	

Update Subscriptions

You can subscribe to Posts, Tags, Groups and Members and you can view it all, or filter by category on one page.

you can search for the subscription in case it's a lot and alter if you want to subscribe for the comments for every post with a given tag or group.

If you want to turn on or turn off the emailing from the site - there is one switcher for it: receive notifications.

### Settings

#### Delivery of notifications

☒ **Receive notifications**  
You can temporarily suspend notifications from being sent.

#### Preferences

☒ **Digest mode**  
Merges your notifications into a single email, sent at the interval you specify..

**Send interval**

Daily

The frequency of notifications; it may take longer, but notifications will not be sent more frequently than indicated.

☒ **New posts**  
Send email notifications when new post published.

☐ **Subscribe to comments**  
Send email notifications when new comments and answers published.

☒ **Auto-subscribe to comments**  
Automatically subscribes you to items that you comment on (if you have that permission).

## Permalinks and answers

Comments and Answers have permalinks now.

So you can share the link to the comment or answer. It will open the post and place the screen on the comment with nice animation. E.g. like this Michelle's [comment](#) which is shown in the screenshot:

So there's a 1.1 beta channel for Atelier listed here: <https://download.intersystems.com/download/atelier.csp#auto-update>

Is there a changelog somewhere for that? I'm just wondering what features from the current roadmap are available for testing.

  Rating: 0

**Comment by Jeffrey Drumm** 19 hours 57 min ago

[delete](#) [edit](#) [Add comment](#)

We will be publishing a post describing the newly available changes and roadmap progress for Atelier 1.1 later this week. We will continue this policy with every new update release going forward as well. Please keep an eye on this space.

  Rating: 1

**Comment by Michelle Stolwyk** 19 hours 53 min ago

[delete](#) [edit](#) [Add comment](#)

Also, email notifications now contain permalinks to Comments and Answers too. Like [this one](#) from Aline:

Dear [Evgeny Shvarov](#)!

[Aline Rena](#) added new [comment](#) to your post [Meet John Murray, InterSystems Developer Community Moderator](#)

Glad to hear that! I have met John more than 15 years ago in Cambridge when he kindly helped me with MSM-Wc he was a MSM authority too :) Congratulations, John!

**Comment by [Aline Rena](#) 21 June 2017**

[Add comment](#)

### Original Post

Hi, Community!

I'm pleased to introduce [John Murray](#) as a new Developer Community moderator.

Better email notifications

And we improved email notifications again.

1. Every comment now shows the original post/comment/answer it relates to (see the above screenshot).
2. There is "read more" cut for the long posts.

Small fixes

Answers on member's page now directly show the answer on the question's page once being clicked (yes! it didn't before!). E.g. see the [answer](#) on [Fabian's](#) answers page:

### Answer:

Hi!

A couple of things to note/check on your end:

- %SYS\_Monitor service is enabled (and is not restricting access for your IP)
- Make sure the iscsnmp.dll is registered. You can run  
d \$ZU(190,5,0) to delete the registry entries  
and  
d \$ZU(190,5,1) to add them again.
- Restart SNMP in Cache:  
zn "%SYS"  
d stop^SNMP  
d start^SNMP
- Make sure there is a SNMP job running in your instance (System -> Processes, filter for SNMP)

[Edit](#) [Add new comment](#)

**3**  
comments

**+ 1**  
rating

Answer by [Fabian Haupt](#) 4 May 2017.

3. Post stats (views, comments) now are available on the post page too.

Rating: **9**

Comments: **8** Views: **147**

Post by [Evgeny Shvarov](#)  
6 days ago

**9** ★

4. For posts older than 2 weeks the date is shown like DD Month YYYY.

## ? Output 9876543210 without using numbers

Caché, Contest, Caché ObjectScript (COS)

Hi, Community!

8★

Post by **Eduard Lebedyuk** 6 June 2017.

**Last answer** 12 days ago. **Last comment** 13 days ago.
