Portal tip: Working in a different language

Recently I was conducting a remote support session with a site. The desktop they were sharing with me was on a PC configured with German as the native language. Since my German is rather rusty, and virtually non-existent when it comes to computing terms, I was glad to be able to switch the Portal session into English.

This is done from the page that appears when you use the About link:

System Overview

| | |
|--------------------------------------|---|
| Version: | Cache for Windows (x86-64) 2017.1.1 (Build 111U) Wed May 17 2017 15:34:56 EDT |
| Configuration: | C:\InterSystems\Ens171\cache.cpf |
| Database Cache (MB): | 151 |
| Routine Cache (MB): | 33 |
| Journal file: | c:\intersystems\ens171\mgr\journal\20170621.001 |
| Superserver Port: | 19871 |
| Web Server Port: | 57871 |
| License Server Address/Port: | 127.0.0.1/4001 |
| Licensed to: | 2017.2 Field Test Keys |
| Cluster support: | This system is not part of a cluster |
| Mirroring: | This system is not a mirror member |
| Enterprise Manager status: | Not managed |
| Time System Started: | 2017-06-16 12:02:43 |
| Encryption Key Identifier: | Not available. Encryption is not activated. |
| NLS Locale: | ENUW |
| Preferred language for this session: | English (United States) ▾ |

All I needed to remember was that the About link is the second one, and the language selection dropdown is at the foot of that page.
