Removing iteration from OBX;5 in ORU 2.5.1 outbound results

Hello,

I have been struggling and could use some help as I think I'm burnt. I am trying to change a Textual 2.5.1 OBX;5 with multiple iterations to a simple non-iterating outbound result. I have played around with $piece but can't seem to get it to work. The outcome I would like is for OBX;5 to look like this: ¦Positive¦ and currently it looks like this: ¦Positive¦ Any suggestions would be appreciated.
