Discarding Received non HL7 data

Hi ,

  I'm using standard business service not(Customized business service). I'm not able to process the Hl7 data file which contains CRLF characters.It shows warning "Discarding Received non HL7 data". Actually it discards some segment after CRLF character. Is there any settings to overcome this problem?

Also i tried UTF-8, Ascii,Unicode.. characterset . But it won't work. Please help me .

Urgent!!!
