## Come to the 1st InterSystems Community Meetup in Cambridge!

Hi, Community!

Recently we announced [Developer Community Meetup in Cambridge, MA](#). Let me describe what is it.

Meetup it's a one evening event where you can enjoy some sessions by presenters (today InterSystems engineers, tomorrow you can be a presenter) and chat with local developers and InterSystems developers, engineers and product managers (depends on who is in town) and discuss your problems, experience, and success with InterSystems technologies.

InterSystems would provide the place, technical sessions, some food and beverages.

We think the Developer Community would benefit from it. We can make the event a regular thing and introduce it in different cities and countries. The success of the event depends on whether you come.

Do you want InterSystems meetup?

See you on [8th of August in Cambridge Innovation Center!](#)
